

Probate: The Problems, the Panic and the Process!

Even the mere mention of the word “probate” produces feelings of anxiety for most of us. This seminar will provide a basic framework of understanding of the legal distribution of a person’s assets after they die. Healthcare providers in the geriatric field are often the first people families turn to when dealing with end-of-life issues. This seminar will examine how Probate works in the State of Georgia, how best to handle an estate if there is no will in place, and some of the complications that may arise in the Probate process. We will also review possible ways to avoid Probate and discuss if an attorney is necessary to complete the process. Case Studies are presented to encourage dialogue and present real world scenarios.
